

In a special partnership with

J.P. Mascaro & Sons is proud to announce that we are the first solid waste company to start curbside collection and recycling of flexible plastic packaging in North America. We are expanding our recycling collection services in your community!

Come and learn about the **"WIN WIN"** advances we're making in the recycling industry by increasing sustainability and offering expanded services to our customers.

By being a part of this event, you will gain an understanding about what flexible plastic packaging is and how this material will be **removed** from the waste stream.

Learn about the new **"GREEN"** technology we have invested in at our materials processing plant, **TotalRecycle**.
